## PROJECTS

### [Full Stack E-Commerce App](#)

July 2022

- Utilized HTML5, CSS, Bootstrap, Javascript, React.JS, Node.JS, MySQL, and AWS RDS.
- Hosted Front-End on Netlify and Back-End to Heroku. Created a Full-Stack E-Commerce React Application. and displayed using AXIOS to get the data. Created 4 filters that work. The App contained a SQL database of 'Products' that was connected to AWS RDS

### [Hope Hack Group Project](#)

June 2022

- Worked with a group to create a website that focuses on helping parents find the right school for their children. My role was to get an 3RD PARTY API that fetched us ranks of schools along with other valuable information. We worked in a agile-like environment to delegate roles and we updated each other daily during a stand-up session.

### [E-Portfolio Website](#)

August 2022

- Created a E-portfolio that displays all my work and a description about me with React, Javascript, HTML, CSS. Created sections where the users can see my work/projects along with the respective links. Validated Contact Page with Email.js.
